

QuietAir™ Cabinets

QuietAir Cabinet

- ⑩ SafeStart™ technology for full pressure restarts
- ⑩ Powder coated aluminium for a durable attractive finish
- ⑩ Redundant cooling system with ventilation grill and high capacity fans
- ⑩ Easy access design with barrel lock
- ⑩ Easy plug-in connection to waterside electrical service
- ⑩ Heavy duty light weight mounting pad included
- ⑩ Integrated cabinet muffler for quieter operation

"Whether I am selling a Vertex system over the internet or to one of our local pond management accounts, my customer is getting the very best value for their money."

Kevin Tucker
President, Virginia Lake Management

Sound Kit

Vertex has developed a Sound Kit for those times when the cabinet must be placed in areas closest to buildings and outdoor recreation areas.

For each 10 decibel drop, humans perceive the sound to drop by half

All new cabinets can be shipped with or without the Sound Kit to suit the needs of the customer and the restrictions of the site. Let us help you to design a system that meets all requirements

Bottomline Tubing

- ⑩ Use with standard PVC solvent weld cement
- ⑩ 6mm wall thickness for long term durability
- ⑩ Over-sized I.D. for high flow
- ⑩ Self-weighted for easy installation
- ⑩ Available in 30m & 150m increments
- ⑩ Remains flexible in cold temperatures
- ⑩ Available in 3/8" to 1" I.D.

Brookwood Compressor

- ⑩ Highest flow rate of any compressor in its class
- ⑩ Available in 220v 50Hz
- ⑩ Oil-free - requires no lubrication; just periodic replacement of air filter
- ⑩ 2 - 4 times the duty cycle of other compressors
- ⑩ 2 - 4 year extended duty cycle between scheduled maintenance
- ⑩ Thermal overload protection
- ⑩ Available as VBS - remote valve box (sold separately)
- ⑩ Superior piston design provides higher pressures
- ⑩ No possibility of compressor damage after loss of electricity.
